

# STRATEGIC FUND DEVELOPMENT

## OUR GOAL

To build an ongoing, long term base of support that by 2028 would be \$100,000/year specifically to further develop the five strategic areas listed below. We are prayerfully seeking \$20,000 in new, annualized giving each year until this financial goal is met.

## FUND OUTCOMES

### RESOURCE DEVELOPMENT

The development, design, production and dissemination of high quality, Biblically sound ministry resources for indigenous leaders in multiple languages. Examples include online courses, guide manuals, training tools and books.

### ADMINISTRATIVE SUPPORT

The addition of administrative personnel and infrastructure that supports and creates space for our training team to focus on what they do best, encouraging and equipping leaders around the world.

### STAFF DEVELOPMENT

Support for the ongoing development, training and equipping of our long-term staff, as well as cultivating team culture. This can include specialized training, team retreats, and staff ministry needs.

### SCHOLARSHIP FUNDING

Creating opportunities for worthy indigenous participants to attend trainings that they otherwise would not be able to afford. Carefully managed through a scholarship application and review procedure to provide selection criteria and accountability.

### STRATEGIC OPPORTUNITIES

Carefully managed support for unique, strategic and important opportunities where funding may be the prohibitive factor, especially for foreign staff located in regions where fundraising is particularly challenging.
